

CERTIFICATE

Number: 2213155

The environmental management system of the organization(s) and locations mentioned on the addendum belonging to:

SPIE Nederland B.V.

Huifakkerstraat 15
4815 PN Breda
The Netherlands

including the implementation meets the requirements of the standard:

ISO 14001:2015

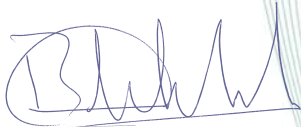

Scope:

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique, automation & IT, civil technique, (water) soil remediation, concrete- and water constructions for the industry (including engineering chemical tank installations), utilities and (Rail) infra structure, including inspections in explosive atmospheres civil technique for (Rail)infra structures. Including design, construction, management, maintenance of underground and above-ground networks regarding telecommunications, cable TV (CAI), electricity, gas, water and sewerage, including associated secondary activities.

Certificate expiry date: 1 November 2029
Certificate effective date: 1 November 2026
Certified since*: 1 November 2005

This certificate is valid for the organization(s) and/or locations mentioned on the addendum.

DEKRA Certification B.V.

B.T.M. Holtus
Managing Director

R.C. Verhagen
Certification Manager

© Integral publication of this certificate and adjoining reports is allowed.
* Against this certifiable standard / possibly by another certification body.

ADDENDUM

To certificate: 2213155

The environmental management system of the organization(s) and/or location(s) of:

SPIE Nederland B.V.

Huifakkerstraat 15
4815 PN Breda
The Netherlands

Certified organization(s) and/or locations:

Different scope

SPIE Nederland B.V.
Huifakkerstraat 15
4815 PN Breda
The Netherlands

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique, automation & IT, civil technique, (water) soil remediation, concrete- and water constructions for the industry (including engineering chemical tank installations), utilities and (Rail) infra structure, including inspections in explosive atmospheres civil technique for (Rail)infra structures. Including design, construction, management, maintenance of underground and above-ground networks regarding telecommunications, cable TV (CAI), electricity, gas, water and sewerage, including associated secondary activities

SPIE Nederland B.V.
Industry Services - E&I
Sanderboutlaan 8a
6181 DN Elsloo
The Netherlands

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique and automation for the industry

SPIE Nederland B.V.
Industry Services - E&I
Innovatieweg 12
4542 NH Hoek
The Netherlands

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique for the industry including inspections in explosive atmosphere

SPIE Nederland B.V.
Industry Services - E&I
Gewenten 43
4704 RE Roosendaal
The Netherlands

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique for the industry including inspections in explosive atmosphere

SPIE Nederland B.V.
Industry Services - E&I
Middenstraat 5
9611 KE Sappemeer
The Netherlands

Providing technical solutions in the disciplines of process technique, mechanical and electrical technique for the industry including inspections in explosive atmosphere

Different scope

Providing integrated advice, development, design, realization, and installation of buildings and technical installations for new construction, renovation/restoration, and sustainability projects in the utility, industrial, and infrastructure sectors. Delivering multi-technical services for structural facilities, shell construction, façades and roofs, electrical installations, low-voltage systems, ICT systems, distribution systems, lighting, fire and security systems, mechanical installations, drainage systems, climate control, distribution, process and potable water installations, site facilities, energy supply, heating and cooling generation, and building automation

The installation, realization, maintenance, management, facilitation, and inspection of buildings and technical installations in the utility, industrial, and infrastructure sectors for low-voltage electrical systems, fire and security systems, structural facilities, energy supply, building automation, horizontal and vertical transportation, ICT systems, climate control, heating and cooling generation, distribution, process and potable water systems, security management, and lighting

Calculating and performing inspections, measurements, and validations of building installations and climate control systems in order to verify compliance with requirements and conditions and optimize them within the specified parameters. Measuring, adjusting, optimizing, and validating sensors and transducers, including measuring instruments
